MUSHTAQ'S FOOD MACHINERY

Ladoo Machine

Machine Key Features

- Easy Quick to Operate
- Consistant Ball Size
- Hygenic Operation
- Table Top Design
- Huge Labour Saving Benefits
- Numerous Product Capability
- Non Stick Teflon Moulds
- High Output
- Continous Operation

Full Description

Mushtaq's Food machinery has made it possible to eliminate this time-consuming process by forming Ladoos or food balls by the palms of your hand traditionally done all over the world, by the Invention of The Ladoo Making machine.

The Table Top Ergonomically designed machine skillfully, accurately, and at high-speed produces perfect sizes of round balls whilst retaining the delicate texture of the product.

The ingredients are skillfully molded into balls through the Teflon conveyor and gently ejected out whilst retaining viscosity" and "elasticity of the product

Mushtaq's new technology which reproduces the traditional technique, that required only hands to processes, completes the job, in a single process

The Machine can be used to form balls of numerous amount of foods, of various sizes built bespoke to your size requirements of product.

A simple yet very advance state of the art machine designed to be user friendly, allowing ease of use, cleaning and assembly.
