## Meat Ball Machine

### Machine Key Features

- Variable ball sizes
- Fully Automatic
- Fully Stainless Steel
- High Volume Output
- Produces Fish, Chicken, Lamb & Veg balls
- Easily Manouverable
- No Wastage
- Very Economical
- Exit Conveyor Optional

### Full Description

**The Mushtaq's Meatball Machine is attractively designed, fully stainless steel construction to combine both portion accuracy and speed of production. The continuous-rotation molding nozzle, and discharge system, makes perfect meatballs with ease.**

With today's trend toward fresh gourmet meatballs, this machine offers a quick and easy way to produce just the right amount of FRESH meatballs whenever they are needed . With the interchangeable Meatball mould nozzles, it is simple to reach the "Home Meal Replacement" market with fresh made, portion controlled, ready to cook, pre- seasoned meatballs and croquettes of various sizes, very easy to use, simply place mixed mince into hopper, select nozzle and produce thousands of balls.

This Meatball Machine is the perfect tool for butcher shops, grocery stores, restaurants, meat labs, meat processors, and anyone who needs consistent portion controlled meatballs, croquettes, Fish Balla, Veg Balls & various other products of similar consistency.
